

QUANTOWER

USER GUIDE

Quantower on Windows

The Quantower platform is available for Windows only. The Trading Pit is offering a free license for all our traders that register for one of our Futures Challenges.

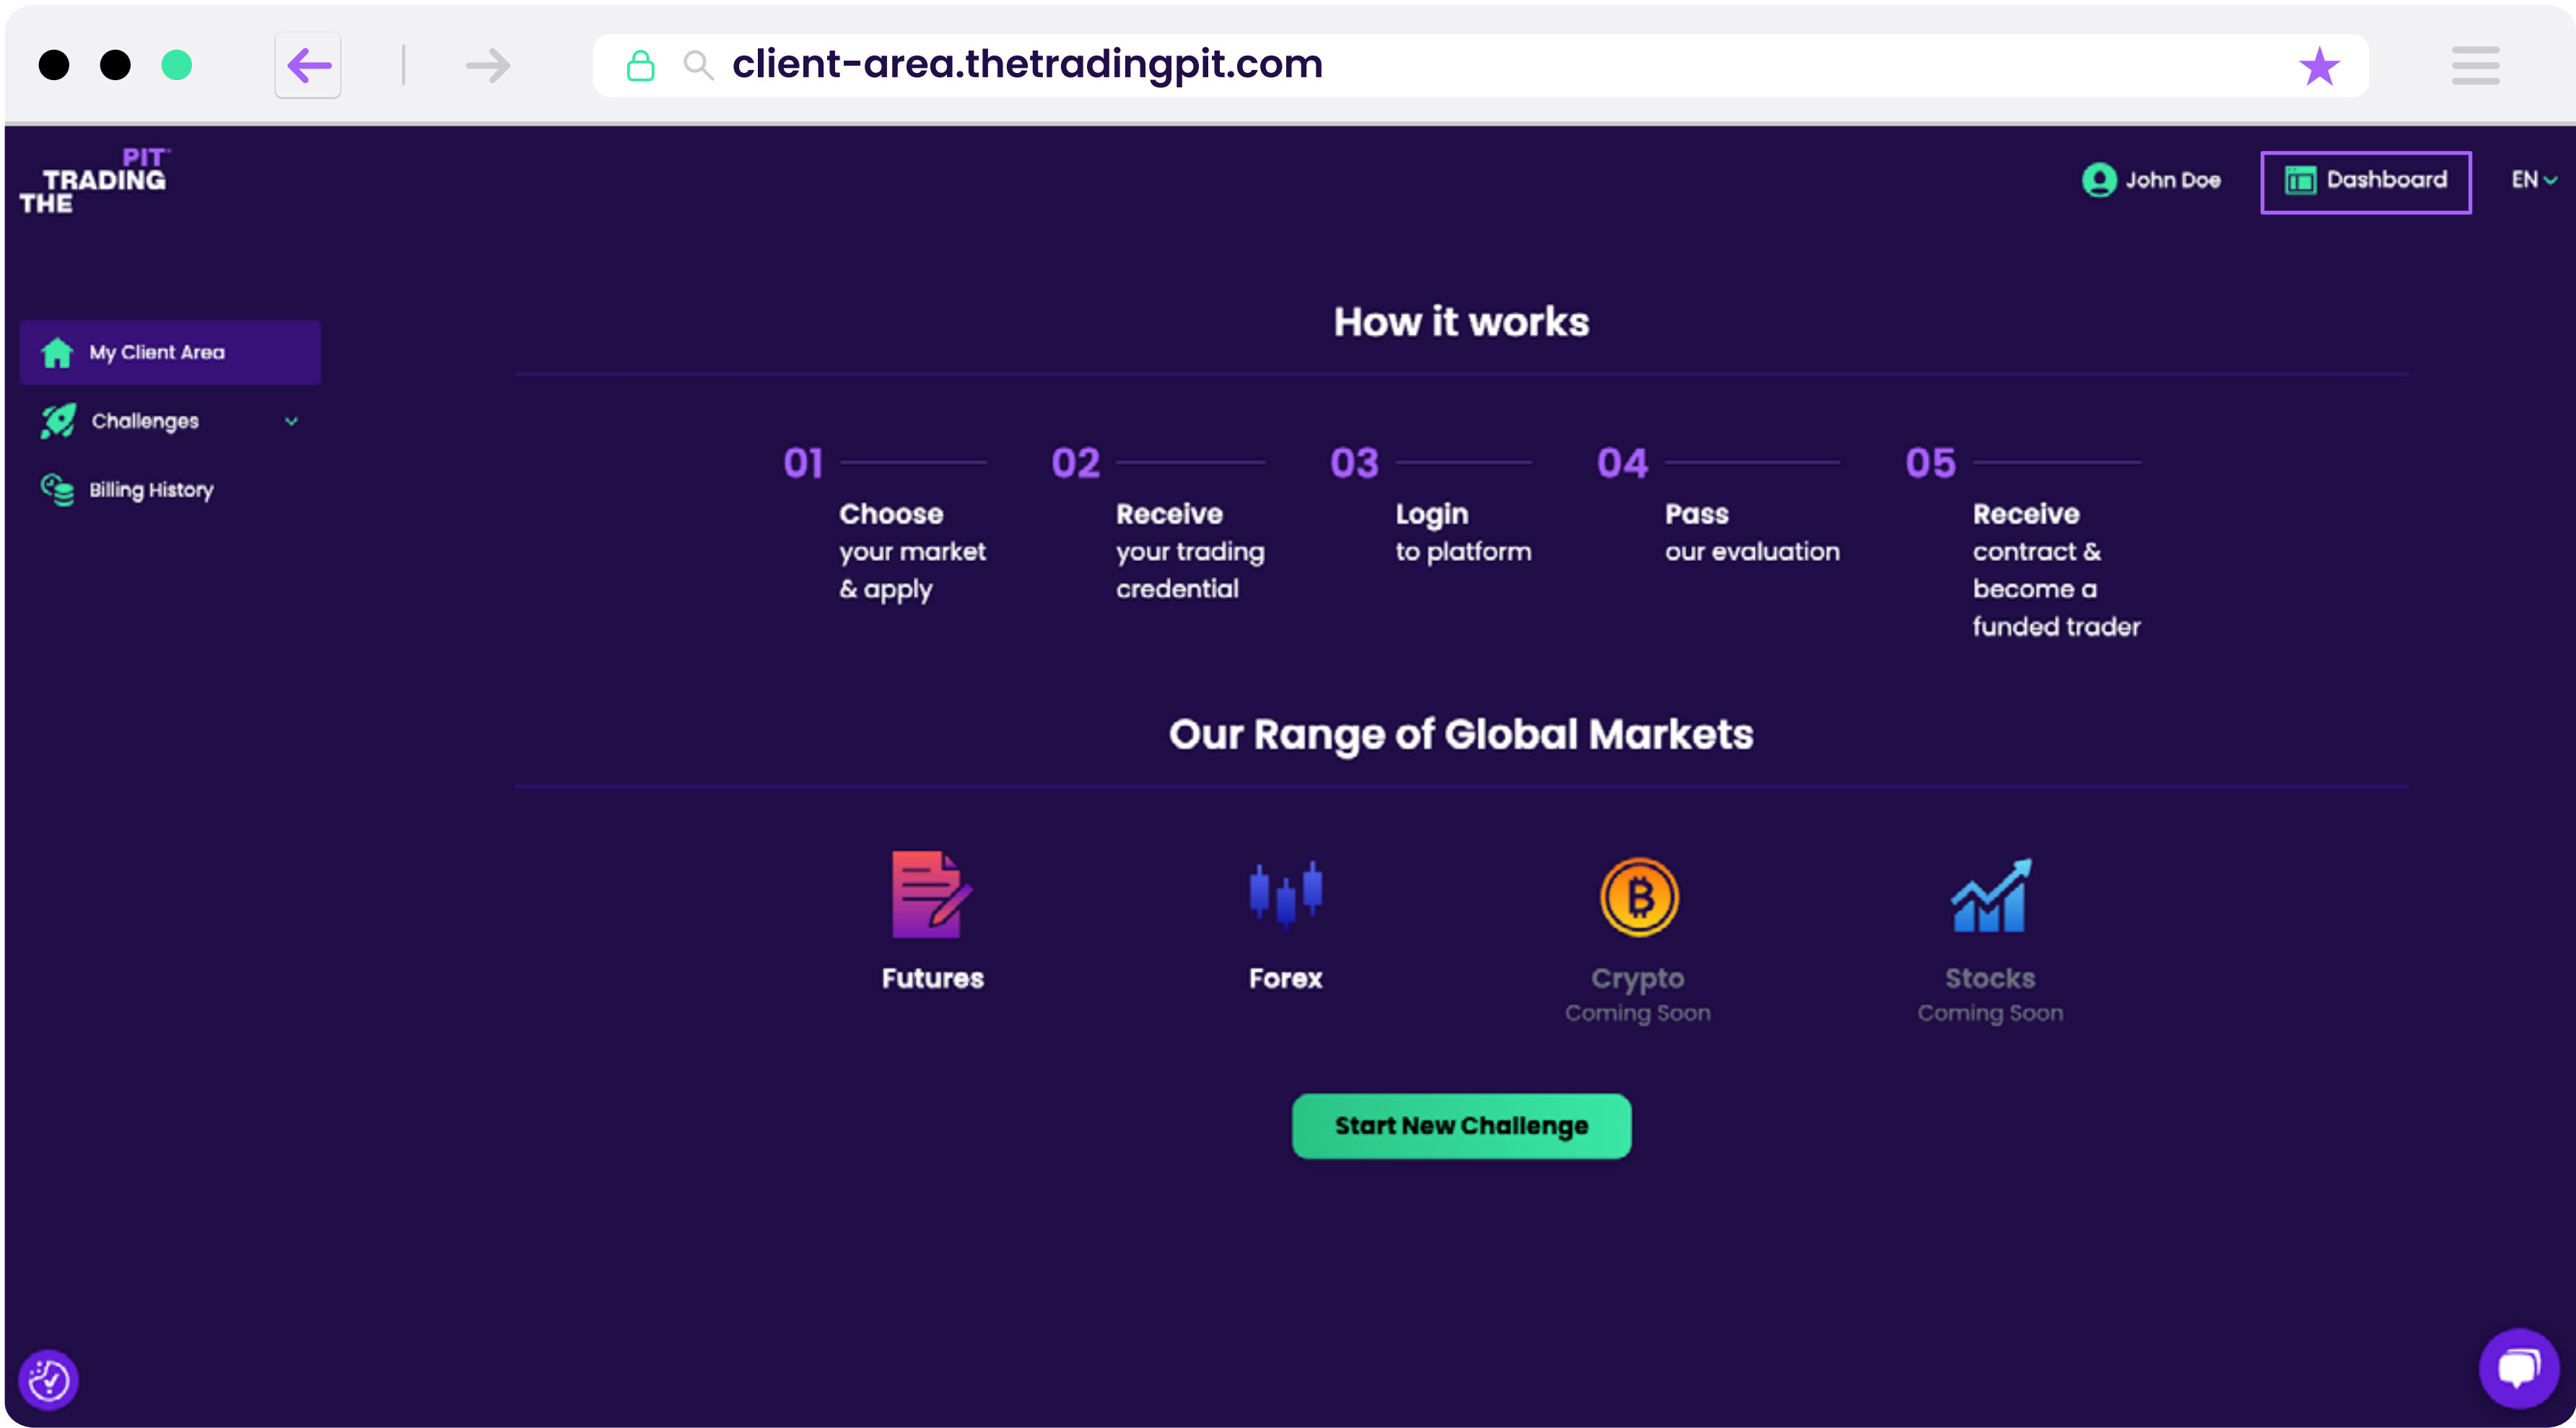

This guide will give you a quick explanation of the download and installation process, setting up our connections, and the removal of Quantower for Windows.

Install Quantower

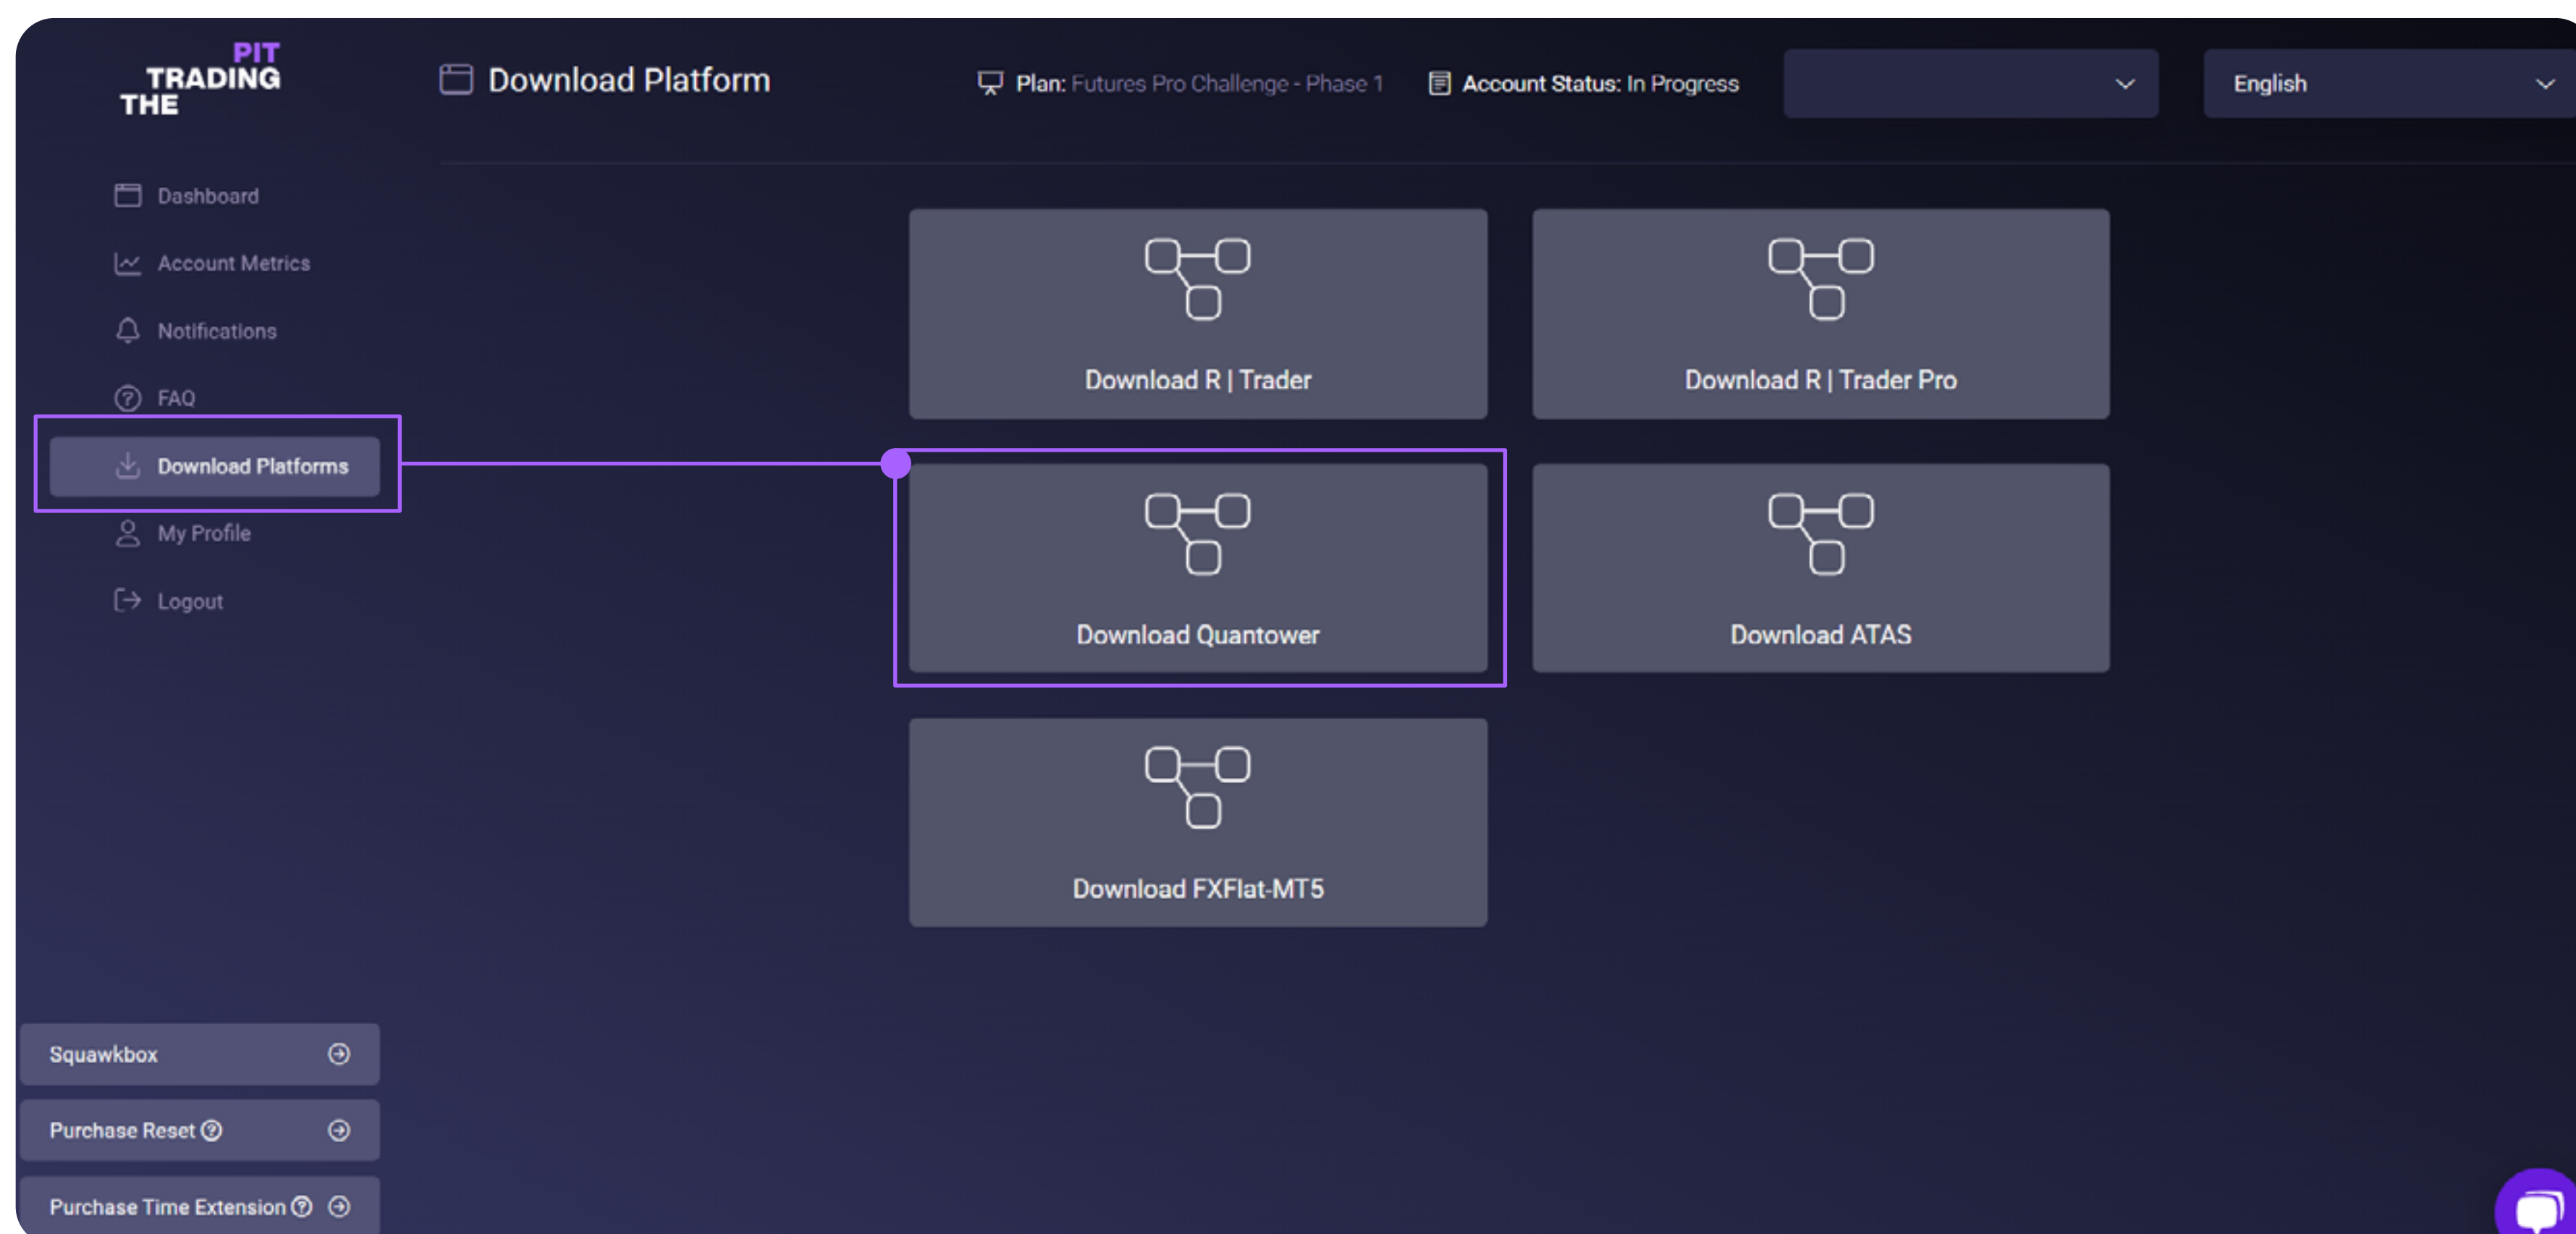

Follow the steps below to download and install Quantower for Windows.

- 1
- In order to Download Quantower and get your free license, log into your **Client Area** and go to your **Dashboard**.

Install Quantower

- 2 Then go to your **Download Platforms tab** and select **Download Quantower**.

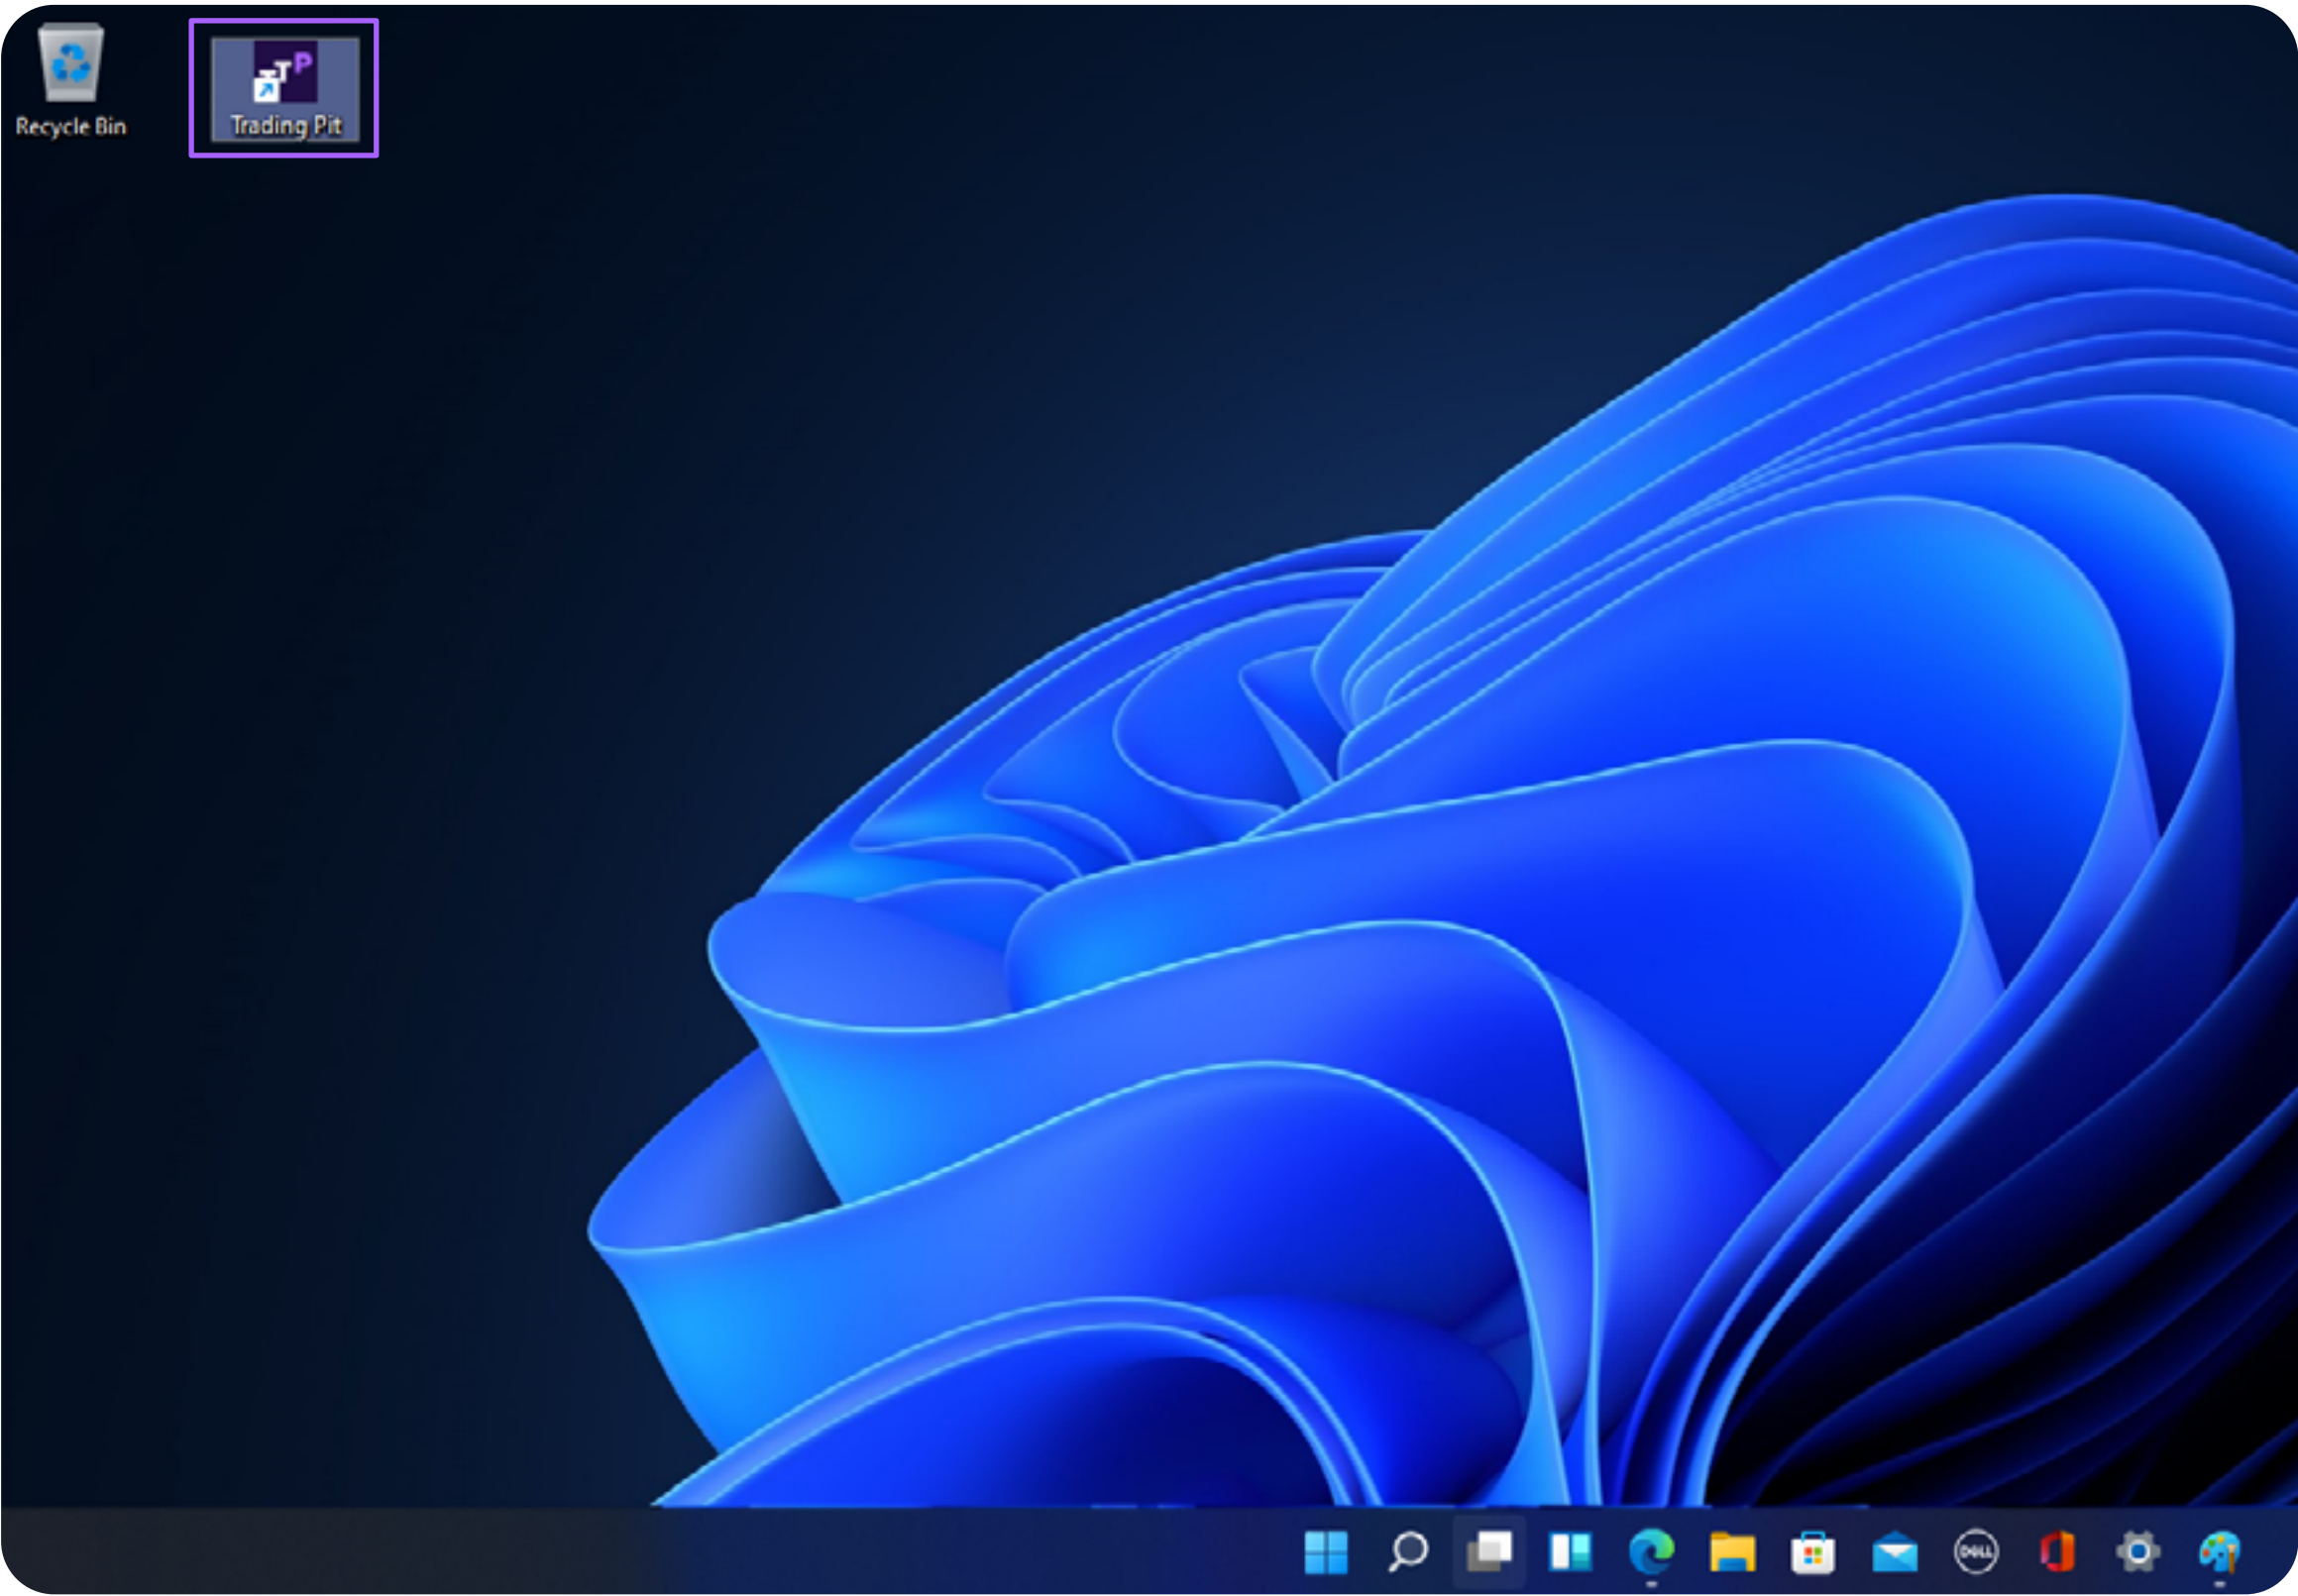

- 3 To start the platform installation, **double-click** on the **setup.exe** file you have downloaded. A new pop-up window will appear with a Welcome to Quantower setup message. **Choose where you would like to save the platform** and **click Extract**.

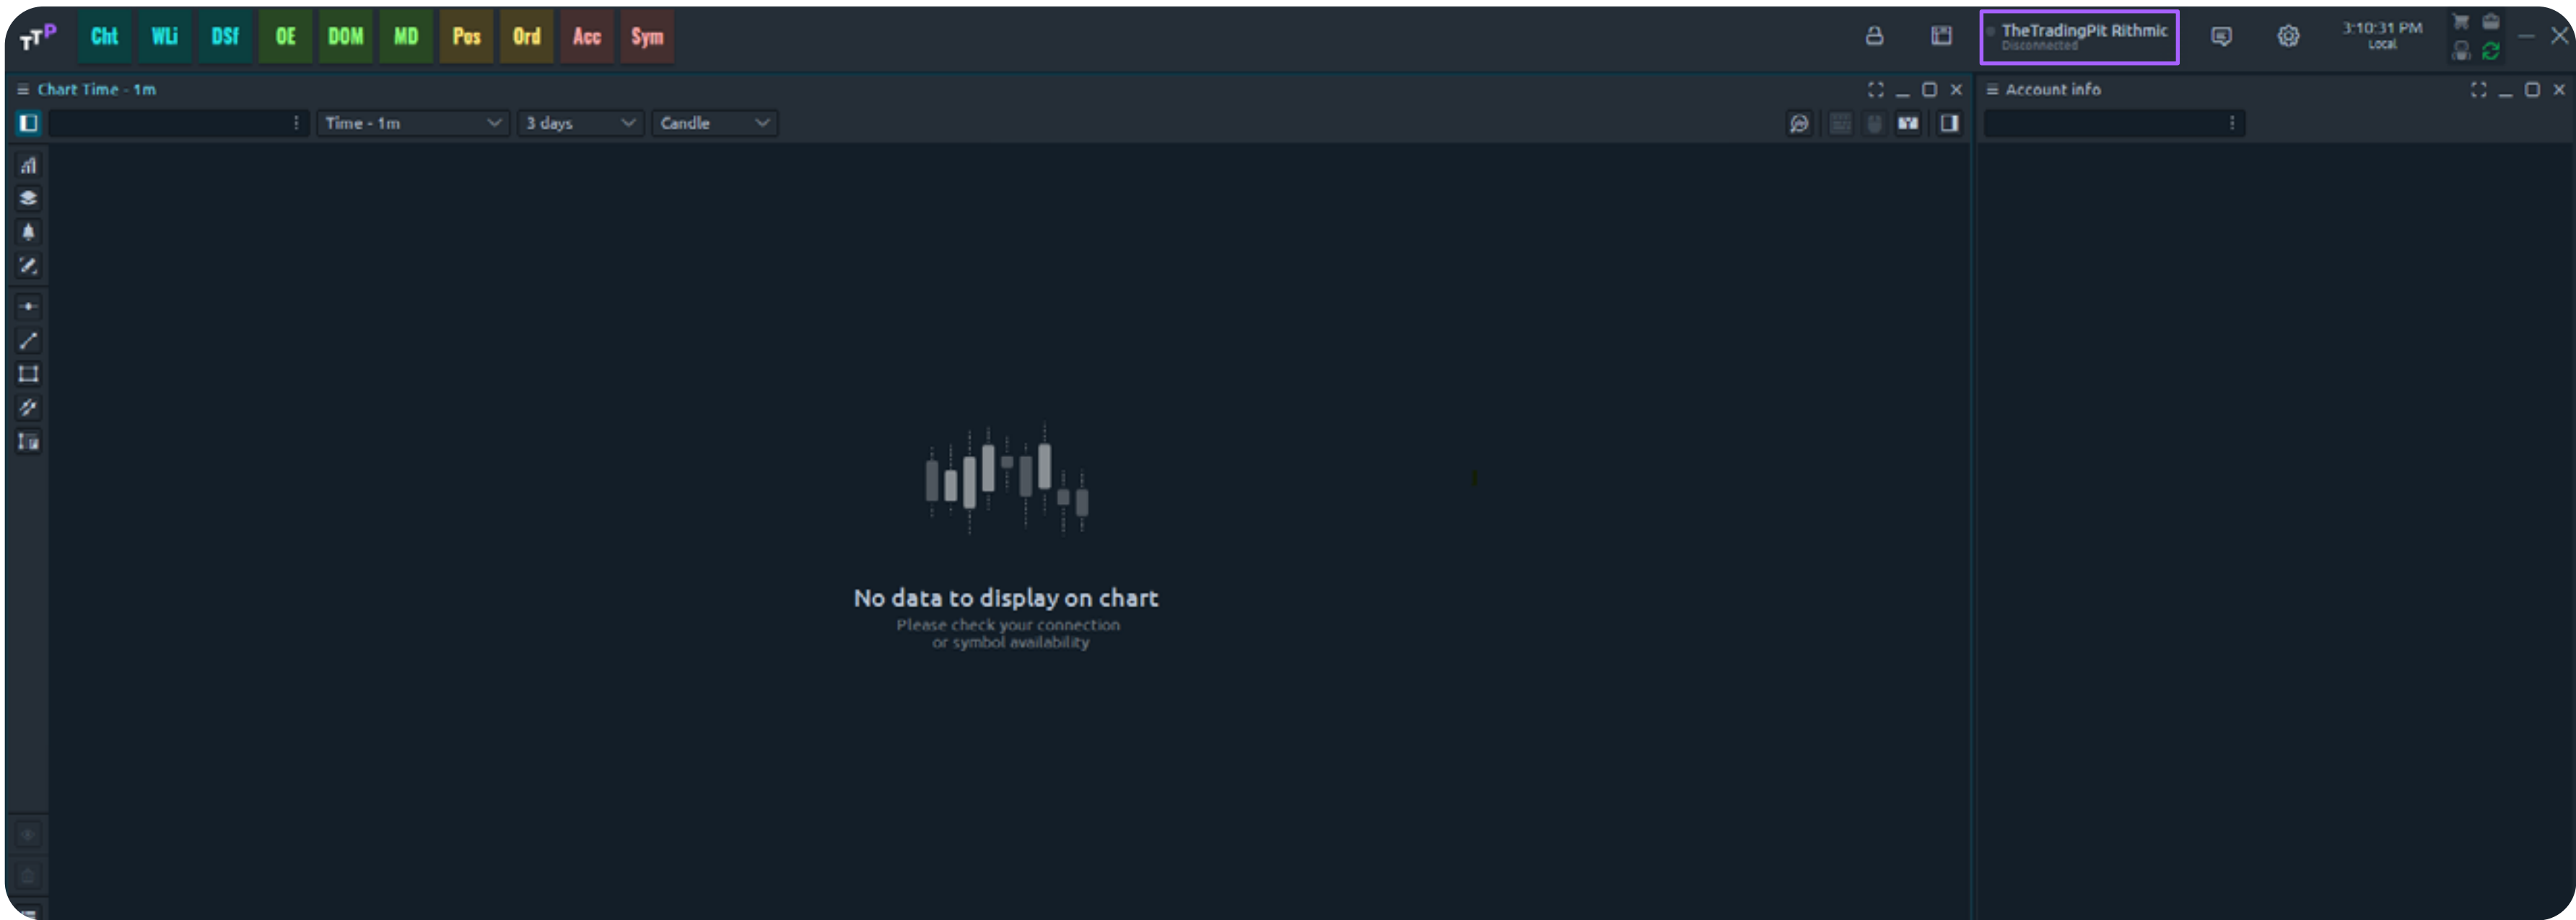

Install Quantower

- 4 Now you will see our Logo as a shortcut on your **Desktop**. To launch the platform, simply **double-click on the shortcut**.

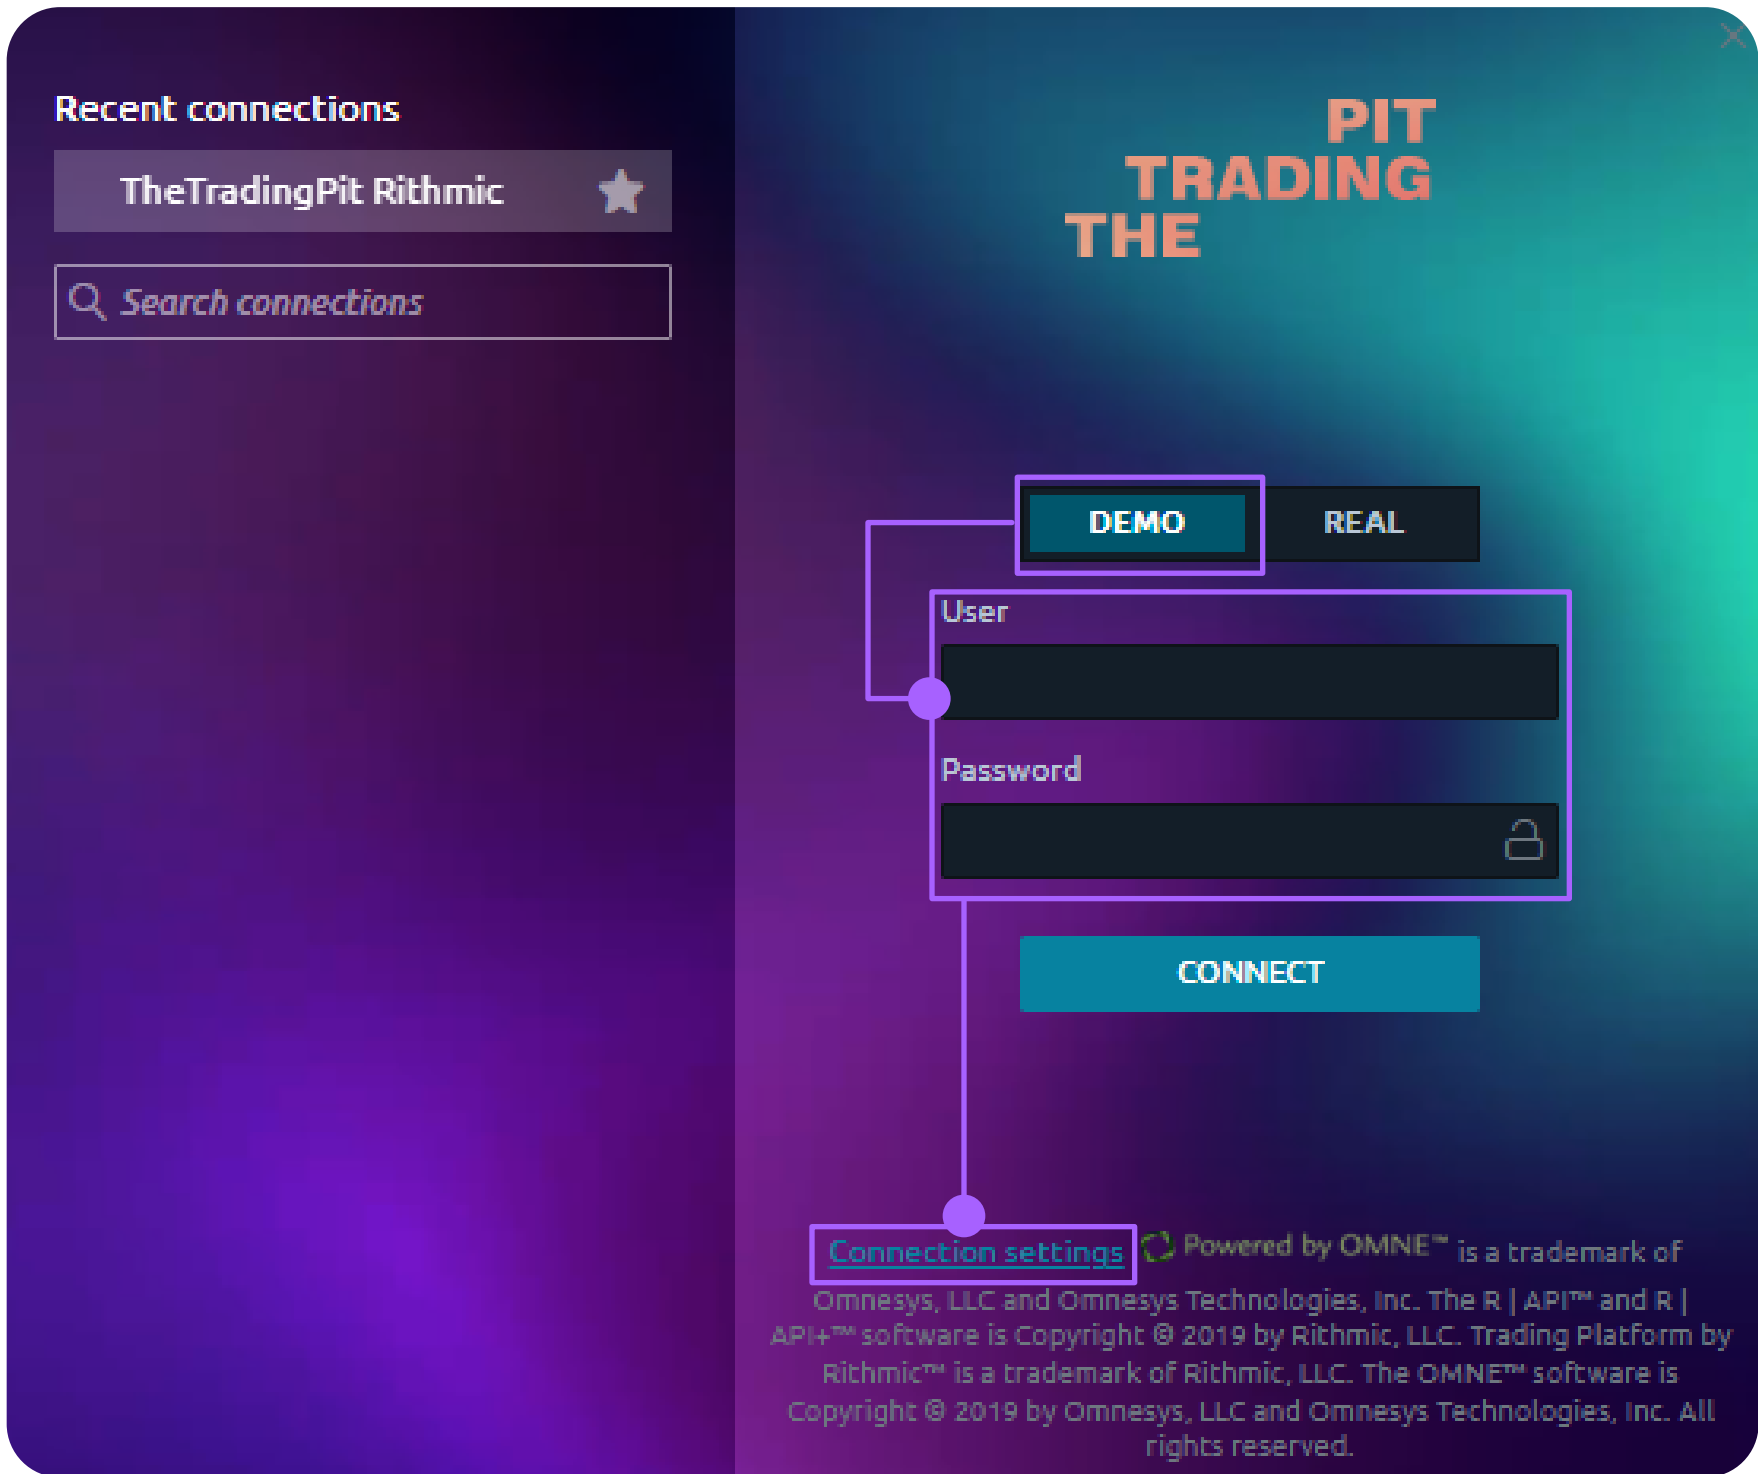

- 5 The Quantower platform header should now be available at the top of your screen. Before you connect your TTP account to Quantower, you must accept the Rithmic Terms and Conditions from [here](#). Check out this [FAQ article](#) if you need any assistance with that.

To connect your TTP account, **click on the tab** in the upper right that says, **'The Trading Pit Rithmic'**.

Install Quantower

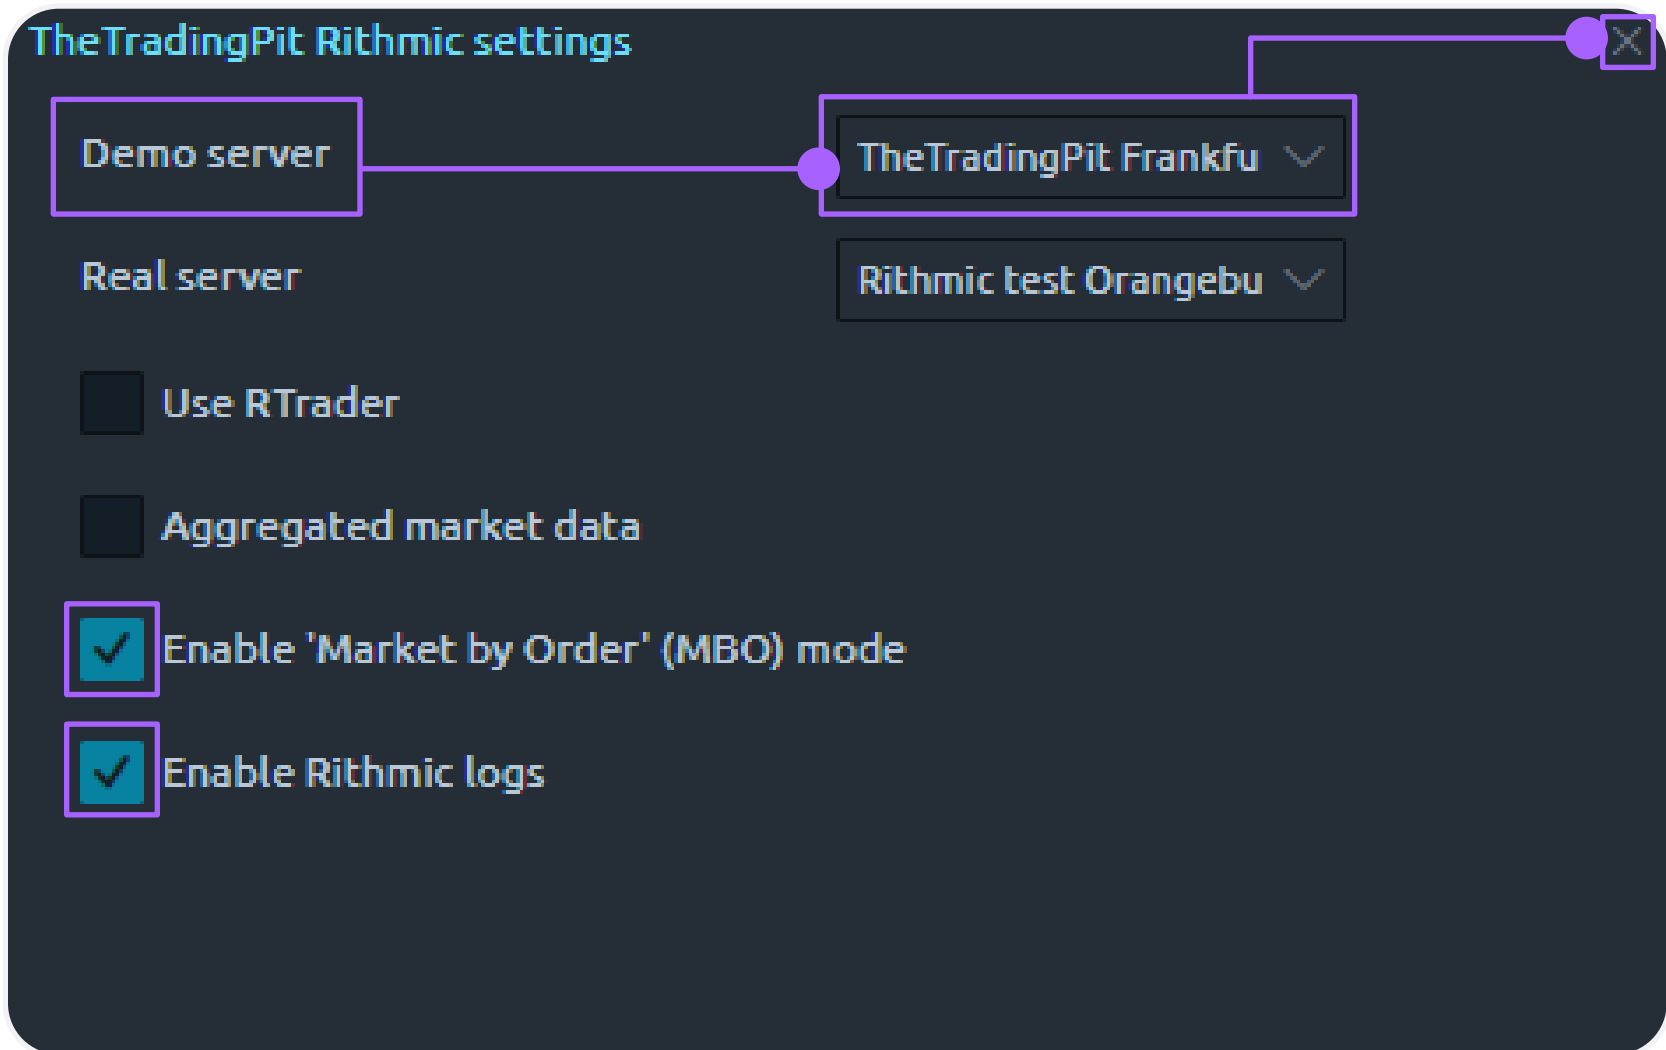

6 A new pop-up will appear for you to log in. To do so, **select** the **Demo** option and **enter** your **Platform User ID** and **Password** we sent you via email. Before you can connect, **click on** the **Connection settings**.

7 After purchasing one of our Futures Challenges, set the **Demo server** to **The Trading Pit-Frankfurt**

Ignore the option for the Real server since for the challenge phase you must be connected to the Demo server.

Please make sure you have **‘Enable MBO’** and **‘Enable Rithmic logs’** boxes checked, before closing the pop-up window and returning to log in.

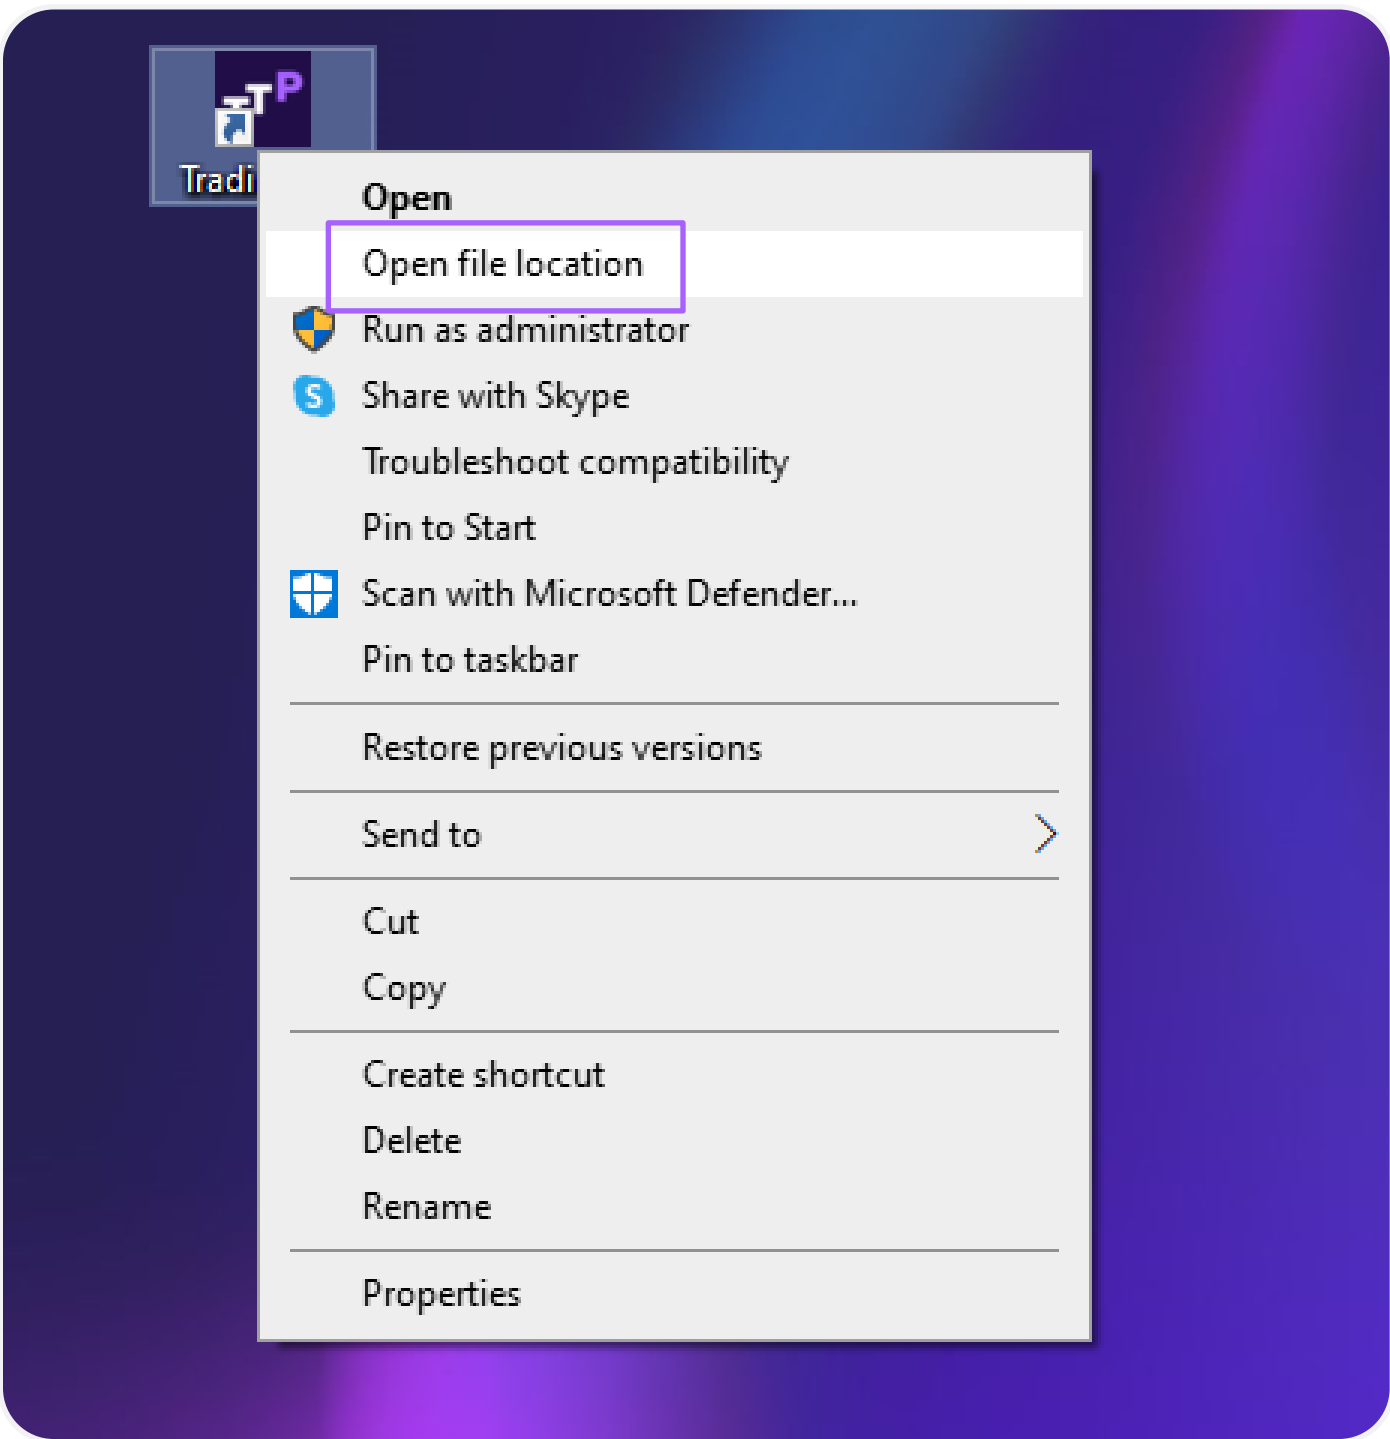

Uninstall Quantower

Follow the steps below to uninstall Quantower from your desktop.

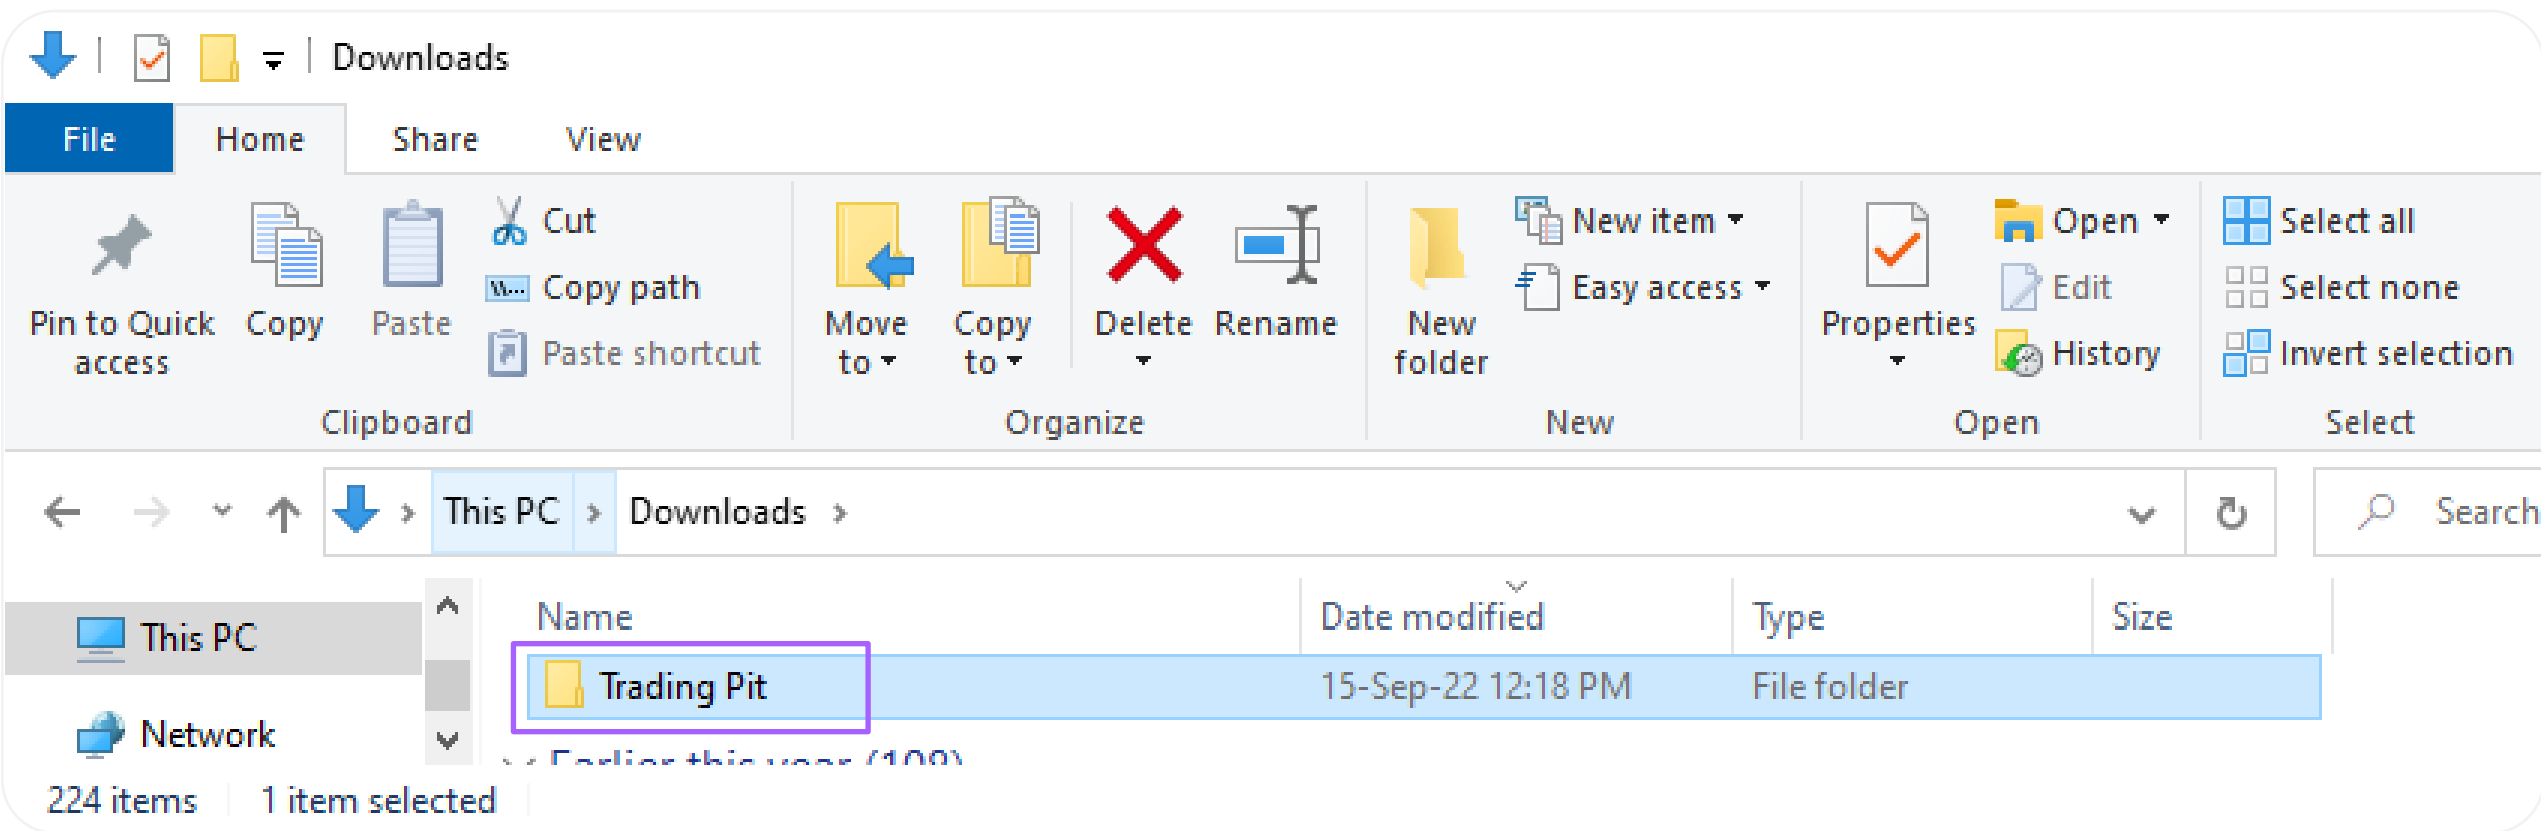

- 1

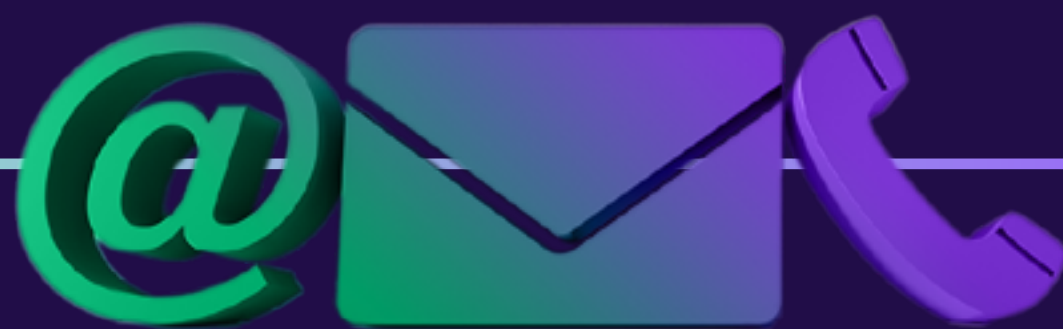

If for any reason you would like to Uninstall Quantower, go to the **app shortcut** on your **desktop**, **right click on it** and **select Open file location**.

- 2

This will take you to the folder where Quantower files are saved. **Click Delete** for the whole folder and Quantower will be uninstalled from your desktop.
